Excella[®] Light with painted elements
Aluminium durable matt grey elements

Excella® Light with painted elements

Aluminium durable matt grey elements

Excella® Light is now available in matt grey thanks to an innovative finishing technology. The grey colour uniformly covers all the metallic parts of this zipper to offer a refined mono-tone aesthetic.

The elements in Excella® Light are made entirely of aluminum, one of the lightest metals in the world.

It is also a strong and corrosion-resistant material, as its surface is always covered with a thin but resistant oxide layer.

Suitable for leather goods.

- Durable matt grey surface
- Lightweight, robust and corrosion resistant aluminum elements
- Durable matt grey finish for slider and parts
- Trendy and elegant effect
