

A close-up, vertical view of a blue zipper. The zipper tape is a vibrant blue with a fine, woven texture. The metal teeth are silver and arranged in a precise, repeating pattern. Several silver metal sliders are visible, each with a small, rectangular pull tab. The lighting is soft, highlighting the metallic sheen of the teeth and the texture of the fabric.

Excella®

YKK

Little Parts. Big Difference.

Made with extreme care, Excella® is YKK's highest quality metal zipper range. All zippers have a clean, sharp design, showing quality and giving the garment an elegant look. Individual pre-formed elements made of polished metal are applied to the tape, one at a time, to ensure the zippers are anti-snagging and scratch resistant. This results in softness and maximum gliding of the sliders on the chains.

Excella®

- Individual element of the zipper is polished and plated.
- Items are available in various surface colours, including silver, gold and antique finish.
- There is a large selection of tapes.
- Zippers are available in sizes 2, 3, 5, 8, 10, 12.
- We can apply polyurethane coating on the tape.

Natulon® with recycled polyester tape

Excella® is available with Natulon® tape (chemically recycled polyester) too. The Natulon® series aims to reduce the use of petroleum derived materials, emission of GHG, and disposal of plastic waste by using recycled polyester yarn for the tape material.

Entirely manufactured in chemically recycled polyester, Natulon® tape comes from post-industrial textile waste and allows for further recycling, since the quality of the polyester obtained is that of a virgin product.
